

Soliton GmbH

Soliton sells and develops equipment for laser and measuring applications. We are the distributor of two Israeli companies: a) Nanonics, manufacturer of Scanning Probes Microscopes and fiber products for nano technology b) Optimet, manufacturer of a laser distance sensor Additionally we represent well known companies building lasers, laser processing machines and optical measuring systems. We also offer high end optical equipment for science and research. Our own developments are focusing on small lasers and measuring applications until now.
