**Website** www.marescotech.com  
**Year established:** 1972  
**Contact person:** Mr. Zeev Maresse, CEO  
Mr. Uzi Avisar, Business Development Manager

**Ownership:** Private  
**Parent Organization:** Sister company - MARESCO TECHNOLOGIES LTD.

**Core Business:**  
Optical systems and elements  
**Total number of employees:** 20

**Overview:**

A privately owned company, TEMMEK OPTICS LTD. originated from an environment of high precision optics, founded by Mr. Zeev Maresse in 1972.

TEMMEK OPTICS LTD. uses advanced turning lathes and diamond fly cutting machines. The Diamond turning & fly cutting operations is of the latest modern model machinery, lead by PHD physicists experienced professional programmers and operators can provide aspheric and diffractive surfaces of high accuracy on wide range of substrates

TEMMEK OPTICS LTD. manufactures optical elements and assemblies, which include lenses, mirrors and prisms from glass, ceramic, Germanium, silicon and other crystals for UV and IR radiation. The Company's activities include spherical surfaces such as conical sections and other modes in elements such as mirrors, lenses and prisms.

TEMMEK OPTICS LTD. supplies optical and mechanical designs based on computer programs and considerable experience.

TEMMEK's thin film coating department is equipped with the latest machines and instruments to enable multi-layer coatings for 0.2-12 microns.

TEMMEK OPTICS LTD. Develops and manufacture in house standard thermal imaging optics for 8 to 12 micron range of uncooled imagers.
